

A. Cosine distance vs FastANI (n=4,970 pairs, 20 Inc groups)

Spearman $\rho = -0.348$, $P < 10^{-100}$

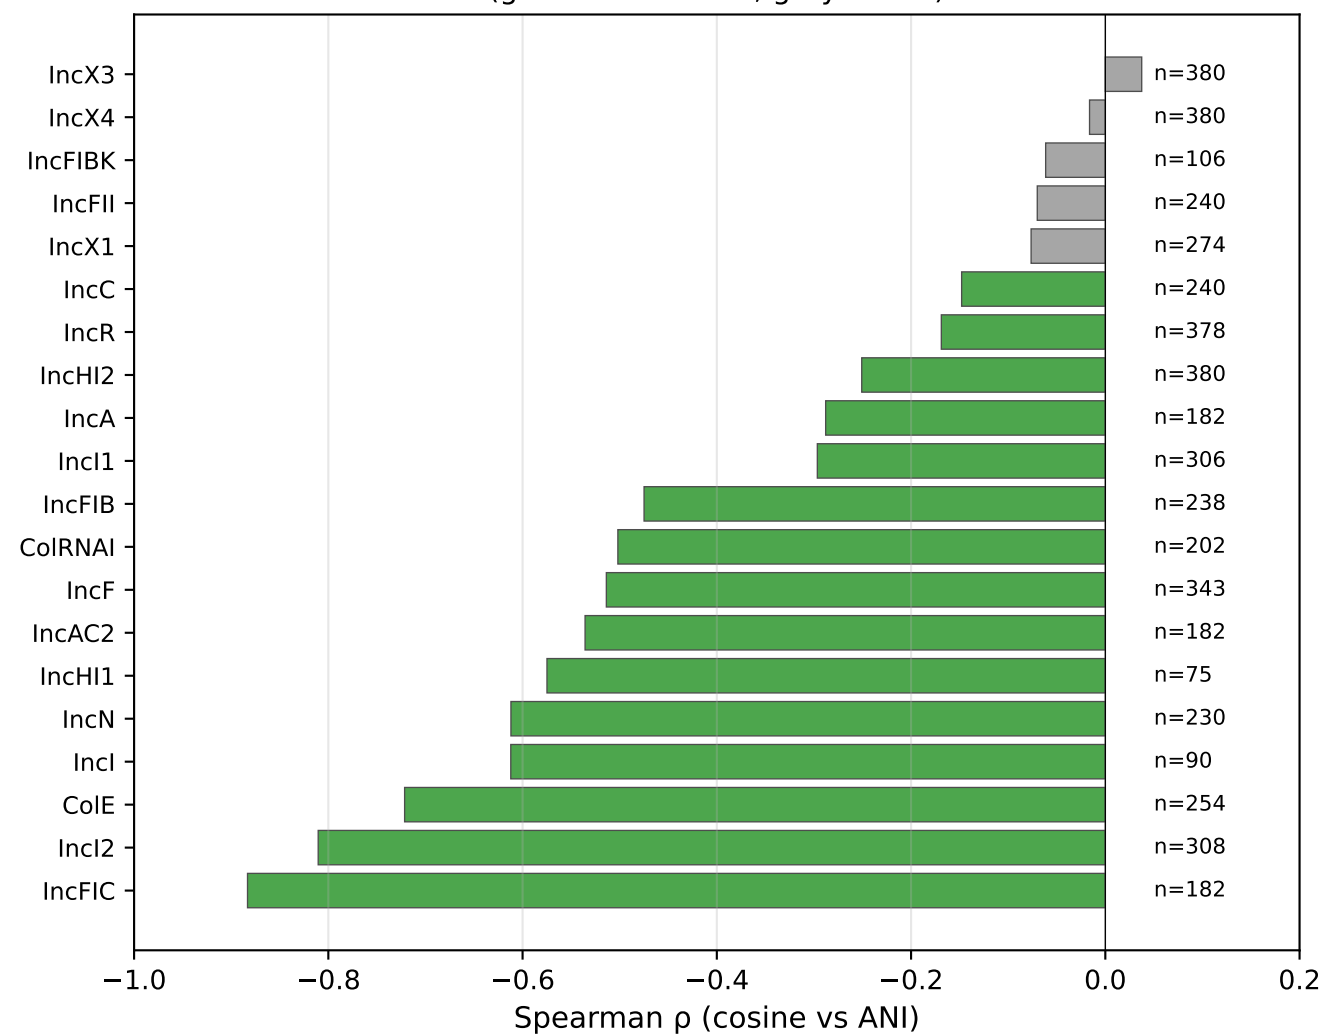

B. ANI distribution per cosine distance bin

(blue dotted = expected ANI)

C. Per-Inc-group correlation
(green = $P < 0.05$, gray = n.s.)

D. Threshold calibration: median ANI vs expected
(error bars = 5th-75th percentile)
